

CentOS 下如何安装 libevent

下载安装包

<http://www.monkey.org/~provos/libevent-2.0.10-stable.tar.gz>

一定要安装 gcc

```
./configure --prefix=/usr
```

```
make
```

```
make install
```

测试 libevent 是否安装成功:

```
ls -al /usr/lib | grep libevent
```

默认路径 /usr/lib/

```
ln -s /usr/lib/libevent-2.0.so.5 /usr/lib64/libevent-2.0.so.5
```
